

Setup PPPoE Internet Broadband connection (e.g Netvigator)

Steps to connect

1. Get this information from your Internet service provider (ISP):
 - * Username (e.g for Netvigator: xxxx@netvigator.com)
 - * Password (e.g for Netvigator: first 6 digit of your HK ID/ Passport Numbers)
2. Make sure that the DSL or cable modem is on and connected to the Internet (based on its status lights) and that the Ethernet cable is connected to the computer. Some modems have separate status lights for each connection.
3. From the **Apple** menu, choose **System Preferences**.
4. From the **View** menu, choose **Network**.
5. From the **Location**, choose **Edit Location** → click on the “**plus**” sign, type in “**Home**”
click **Done** when finish
6. Choose **Ethernet** → from “**Configure IPv4**” choose “**Create PPPoE Service**”
7. Type in **Netvigator** under “**Service Name**”
8. Type your **username** in the **Account Name field**.
9. Type your **password** in the **Password field**. If you want all users of this computer to use the same connection method, select the checkbox for "Save password."
10. Check the box “**Show PPPoE status in menu bar**”

Finish
