

Leopard VPN Setup Procedure

Step-by-step Procedure

1. Open your **System Preferences**.
2. Click on **Network**.
3. Click Add **+** at the bottom of the network connection services list.
4. Choose **VPN** from the Interface pop-up menu.
5. For VPN Type, choose **L2TP over IPSec**.
6. For Service Name, type in **VPN to CDNIS**.
7. Click **Create**.
8. Type **vpn.cdnis.edu.hk** in Server Address.
9. Type **your network User-ID** in the Account Name. For example P0007, P8743, etc. This is also known as your VPN User-ID and each person has only one.
10. Click on **Authentication Settings**.
11. Type **your network password** in Password. Important: This is not your local notebook password.
12. Type **cdnis** in Shared Secret.
13. Click **OK**.
14. Click **Apply**.
